

# Prevail Proudly Presents

## Healthcare Academy™

### Everything Included Approach.

Healthcare Academy (HCA) combines multiple systems to support your quality initiatives. HCA's integrated systems are cost effective, consistent and easy to manage. Live customer service results in successful implementation for maximum return on your investment.

- **One System**
- **Easy Implementation**
- **Cost Savings**
- **No Hidden or Set Up Fees**

### ■ eLearning System

HCA can help you meet mandatory regulatory training requirements with quality courses. Our innovative learning solutions respond to industry-changing initiatives and are continually updated. No other eLearning provider on the market today offers comprehensive QIS and MDS 3.0 training packages coupled with CNA courses, Nursing and Administrator CE and leadership training!

### ■ Survey Preparation - ReadyQ

**ReadyQ** application identifies areas in need of improvement based on the exact same questions and process as the Quality Indicator Survey (QIS) used by state surveyors. HCA goes beyond identifying potential issues by providing educational tools that help you prepare staff for the QIS process to reduce potential survey deficiencies.

### ■ Hospital Readmission Program

The Hospital Readmissions Series is a tool to help you manage and reduce your hospital readmission rates. It will help develop staff members to become Care Coordinators that manage discharge and readmission cases. In addition, this series helps Care Coordinators understand the importance and develop strategies to enhance relationships with hospitals.

### ■ MDS 3.0 Curriculum

The MDS 3.0 curriculum contains 25 lessons that teach staff proper coding of each section of the MDS. This curriculum will help you train new hires, interdisciplinary team members and assess their coding abilities. Within each lesson is a **case study** for practical application.

## Prevail Nurses Support Healthcare Academy

The Prevail Clinical Team will work with facilities to effectively implement and use Healthcare Academy Suite of Programs.
