

PRODUCT DESCRIPTION

The Sur-Fit™ Irrigation Adapter Faceplate allows use of the Sur-Fit Irrigation Sleeve by individuals using Active Life or other one-piece pouches.

ATTACHING AND USING THE SUR-FIT IRRIGATION ADAPTER FACEPLATE TO THE SUR-FIT IRRIGATION SLEEVE

1. Attach a Sur-Fit ostomy belt to one side of the **faceplate**. (Do **not** attach the belt to the irrigation sleeve flange).
2. Position the faceplate opening over the stoma and while holding in place bring the belt around the waist and attach to the other side of the **faceplate**. While holding the faceplate in position, adjust the belt to fit snugly.
3. Locate the bottom lip portion on the **back** of the irrigation sleeve and the faceplate flange, and starting at the bottom, apply gentle pressure around the circumference of the sleeve until it "snaps" into place and feels securely attached. A downward tug on the sleeve will determine if proper flange-to-flange locking has taken place.
4. Irrigate following the instructions in the Sur-Fit Irrigation Sleeve insert.

HOW SUPPLIED

The Sur-Fit Irrigation Adapter Faceplate* is available in two flange sizes:

	Flange Size (Diameter)	Order No.
	45 mm (1 3/4")	22742
	70 mm (2 3/4")	22744

*Must be used with the Ostomy Appliance Belt.

The following products can be used with the faceplate:

	VISI-FLOW Irrigator includes a calibrated bag, a flow indicator, flow regulator and a pliable stoma cone	22735
	SUR-FIT™ Irrigation Sleeve**	45 mm (1 3/4") 24252
	Box of 5 sleeves	70 mm (2 3/4") 24254
	1 tail closure	

**Must be used in combination with the Sur-Fit Irrigation Adapter Faceplate
NOTE: The Irrigation sleeves are available in three other flange sizes (38 mm, 57 mm and 100 mm) for use with the Stomahesive® Wafer with Sur-Fit® Flange.
