

## **Karaya Gum Powder**

- The active ingredient is Karaya Gum Powder, which is obtained from a soft-wooded tree that is native to India and Pakistan. The powder is a popular emollient and the trees are cultivated for use in drugs.

## **Petrolatum**

- In order to spread the active ingredient over the skin, petrolatum is included in the list of ingredients. This acts as a vehicle, but is not an active ingredient.

## **Non-Essential Ingredients**

- The patent specifies that Ilex can be designed to treat different skin problems by adding different non-essential ingredients. The user or pharmaceutical company may add vitamin A, D or E, or different lotions.

## **Cortisone, Anti-Bacteria and Anti-Fungus**

- According to the patent, the cream also contains a low-strength cortisone cream to help reduce redness or swelling. The anti-bacterial cream and anti-fungal cream accomplish what their names suggest.

## **What is not in the Cream**

- The cream contains no alcohol or latex, according to the packaging. These ingredients can inflame irritated skin.
