

Triad Hydrophilic Wound Dressing

Coloplast Triad Hydrophilic Wound Dressing absorbs excess wound exudate while retaining a moist wound environment. Triad Hydrophilic Wound Dressing is a zinc oxide-based hydrophilic paste which gently adheres to moist wound beds. Triad Hydrophilic Wound Dressing protects peri-wound skin and can be utilized when conventional dressings are not feasible. Triad can also be used with a secondary dressing.

Triad Hydrophilic Wound Dressing Features:

- Zinc-oxide based hydrophilic paste absorbs moderate levels of wound exudate (*fluid*).
- Softens and loosens necrotic tissue, while maintaining a moist wound environment.
- Ideal alternative for difficult to dress areas.
- Latex free and sterile.
