This Material Safety Data Sheet is principally directed to managerial, safety, hygiene and medical personnel. The description of physical, chemical and toxicological properties and handling advice is based on experimental results of similar products and past experience. It is intended as a starting point for the development of health and safety procedures. These data are offered in good faith as typical values and not as a product specification. No warranty, expressed or implied, is hereby made.

SECTION 1	NAME & PRODUCT
-----------	----------------

CHEMICAL FAMILY: Organopolysiloxanes  
TRADE NAME: Silicone Therapy Putty  
CAS #: Mixture

## SECTION 2 PHYSICAL DATA

## SECTION 3 FIRE HAZARD DATA

Use standard fire fighting techniques to extinguish fires involving this material: use water spray, dry chemicals or carbon dioxide.

## SECTION 4 EFFECTS OF EXPOSURE

---

This data is based on results from a similar product.

**EYE CONTACT:** Nonirritant to rabbit eyes

**SKIN CONTACT:** Nonirritant to rabbit skin

### HUMAN HEALTH:

**EYE CONTACT:** Direct contact can cause irritation with redness and swelling.

**SKIN CONTACT:** A single relatively short exposure causes no known adverse effect. Several repeated prolonged exposures (24 to 48 hours) may irritate.

**INHALATION:** Due to the physical state of this material, inhalation is unlikely to occur.

**ORAL:** Small amounts transferred to the mouth by fingers during use should not injure. Swallowing large amounts may injure slightly.

---

## SECTION 5 EMERGENCY AND FIRST AID PROCEDURES

---

**EYE CONTACT:** In case of contact, flush eyes well with water for 15 minutes. Obtain medical attention if irritation occurs.

**SKIN CONTACT:** Skin contact is not anticipated to cause irritation. If irritation does occur, obtain medical attention.

**ORAL:** If swallowed, give several glasses of water but do not induce vomiting. If vomiting does occur, give fluids again. Have medical personnel determine if vomiting or evacuation of stomach is necessary. Do not give anything by mouth to an unconscious or convulsing person.

---

## SECTION 6 INDUSTRIAL HYGIENE

---

Available data suggests that exposure to this substance is not harmful.

**ENGINEERING CONTROLS:** In those cases where engineering controls are indicated by the use conditions, the following traditional exposure control techniques may be used to effectively minimize employee exposure: local exhaust ventilation, enclosed system design, process isolation and remote control in combination with appropriate use of personal protective equipment.

**INGESTION:** All food should be kept in a separate area away from the storage/use location. Eating, drinking and smoking should be prohibited in areas where there is a potential for significant exposure to this material. Before eating, hands and face should be thoroughly washed.

**EYE CONTACT:** Eye contact should be avoided. In industrial situations, chemical safety glasses, goggles or a face shield should be selected with regard to use condition exposure potential.

**INHALATION:** Due to the physical state of this material, inhalation is unlikely to occur.

**EXPOSURE LIMITS:** No exposure limits has been established for this material.

---

## SECTION 7 CHEMICAL REACTIVITY

---

Relatively nonreactive.

---

## SECTION 8 STABILITY

---

Stable at ambient temperatures and atmospheric pressure.

---

## SECTION 9 SPILL HANDLING

---

Make sure all personnel involved in the spill cleanup follow good industrial hygiene practices (refer to SECTION 6: INDUSTRIAL HYGIENE).

See SECTION 12: DISPOSAL OF UNUSED MATERIAL

---

**SECTION 10 CORROSIVITY TO MATERIALS OF CONSTRUCTION**

---

Noncorrosive to materials commonly used in the construction of process equipment, storage and shipping containers.

---

**SECTION 11 STORAGE REQUIREMENTS**

---

Store in cool, dry, well ventilated area. Exercise due caution to prevent damage to container.

---

**SECTION 12 DISPOSAL OF UNUSED MATERIAL**

---

Material that cannot be used or chemically reprocessed should be disposed of at an approved facility in accordance with any applicable regulations under the Resource Conservation and Recovery Act (RCRA). NOTE: State and local regulations may be more stringent than Federal regulations.

---

**SECTION 13 DISPOSAL OF CONTAINER**

---

Dispose of empty containers according to any applicable regulations under RCRA. NOTE: State and local regulations may be more stringent than Federal regulations.

---

**SECTION 14 GENERAL INFORMATION**

---

D.O.T. Shipping Name:	None
D.O.T. Hazardous Class:	None
D.O.T. ID Number:	None
RCRA Hazard Class:	None
NFPA:	704
E.P.A. Priority Pollutants:	None
