## Features and Benefits

Features	Benefits
Variety of sizes and put ups	One stop shopping
Low drag catheter surface	Easy insertion into endotracheal tubes
Large opening on control vent	Provides high airflow and efficient suctioning
Staggered and opposite eyelets	Reduces potential for invagination or blocked suction
DeLee Pediatric Tip	Minimize trauma

## Frequently Asked Questions

Question	Answer
What are Covidien's suction catheters made of?	The connector is polyethylene and the tube is PVC.
Are Covidien's suction catheters DEHP-Free?	No, suction catheters are made with PVC which contains DEHP.
Are Covidien's suction catheter Latex-free?	Yes, Covidien's suction catheters and suction catheter kits are latex-free.
What is the length of the Covidien suction catheters?	21 inches
How do I determine what french size to use?	Clinical guidelines suggest a catheter whose outside diameter takes up only 1/3 to 1/2 of the inside of the patient's trach tube.
What are Purple Nitrile™* Gloves?	The Purple Nitrile™* Glove, produced by Kimberly-Clark, is a premium latex-free, powder-free glove that has a very tactile sensitive feel that clinicians demand. This extremely strong glove is made from a synthetic rubber material with no natural latex.
What does one time use mean?	A single-use device, also referred to as a disposable device, is intended to be used on one patient during a single procedure. It is not intended to be reprocessed (cleaned, disinfected/sterilized) and used on another patient. The labeling may or may not identify the device as single use or disposable and does not include instructions for reprocessing.
Is this product sterile?	Yes.
Can Covidien's products be used after the expiration date?	No, expiration dates have been established because we cannot guarantee the product quality is maintained beyond the expiration date.
