

It Stays! Body Adhesive can be used to help hold stockings in place.

It Stays! is a water-soluble, liquid adhesive in a roll-on applicator bottle.

Roll on a small amount of It Stays! Body Adhesive onto skin. It's better to use multiple patches rather than one large area since the body adhesive will shrink slightly as it dries. Press stocking into place.

Simply pull stocking off when you choose to remove it. It Stays! Body Adhesive will not remove skin or hair. Wipe skin off with a damp cloth.

It Stays! Body Adhesive will not stain.

It Stays! Body Adhesive is ideal with thigh high stockings. It can also be used with knee socks, shoulder straps, wigs, toupees, breast forms and nipple covers.
