

AquaDerm™ Waterproof Hydrogel Sheet

AquaDerm is a hydrogel sheet dressing for partial and full-thickness wounds. The hydrogel sheet is insoluble in water, maintains its shape and supports optimal moisture balance in dry or minimally exuding wounds.

Benefits:

- Provides soothing coolness
- Non-traumatic, one-piece removal
- Supports moist wound healing
- Bacteria and fluid barrier
- Absorbs minor exudate
- Conforms easily
- Transparent - easy to monitor wound
- Can be cut to fit wound site
- Latex free

Indications:

For the management of partial and full thickness wounds that are dry or have minimal exudate, including:

- Pressure ulcers
- Minor burns
- Radiation tissue damage
