Transparent Film Dressing For
Catheter Sites**

DermaView™ Transparent Film Dressing

DermaView is a non-absorbent, moisture-vapor permeable transparent film dressing for non-infected wounds with minimal drainage. Maintains a moist wound environment and helps prevent bacterial contamination of wound.

Benefits:

- See-through for evaluation of wound progress
- Sterile
- Conformable
- Latex Free

Indications:

May be used as a primary or secondary dressing. For the management of minimally exuding wounds, including:

- non-infected wounds
- partial thickness ulcers
- full-thickness ulcers
