January 2015

Dear Valued Customer,

Beginning the end of January 2015, the Restore™ wound cleanser, gentle, no-rinse formula will feature an updated spray nozzle with a more ergonomic design. The new nozzle design is cosmetic and does not affect the functionality of the adjustable spray nozzle or the performance of the product.

Restore Wound Cleanser gentle, no-rinse formula:

- Contains a mild surfactant that helps provide effective removal of wound debris without harming fragile wound tissue
- May be used as an alternative to saline and antiseptic cleansers
- Comes in a skin-friendly pH of 6.0-7.0 and is free from animal derivatives, nuts, oils, colorants and fragrances
- Features an adjustable spray nozzle to provide controlled wound cleansing
- Comes in a safety sealed bottle to prevent refilling with other liquids or chemicals that may be damaging to wounds
